

## Praktikum 6: Membuat Aplikasi Client Menggunakan Codeigniter+Harviacode

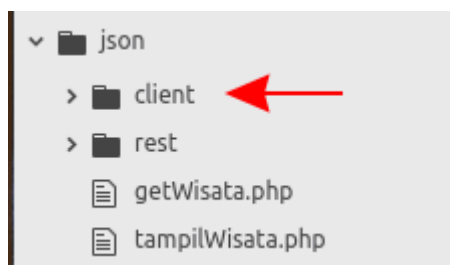

Untuk menyelesaikan praktikum 6 diperlukan dua bahan yaitu Framework Codeigniter dan Harviacode CRUD Generator. Codeigniter digunakan untuk framework aplikasi Client dengan konsep MVC. Harviacode CRUD Generator digunakan untuk menghasilkan skrip Model, View dan Controller secara otomatis berdasarkan struktur tabel.

Harviacode	<a href="https://github.com/bernardvery/Genap1920/blob/master/Rekayasa%20Web/Praktek%20online/pert6/harviacode-codeigniter-crud-generator.zip?raw=true">https://github.com/bernardvery/Genap1920/blob/master/Rekayasa Web/Praktek online/pert6/harviacode-codeigniter-crud-generator.zip?raw=true</a>	CRUD Generator untuk Codeigniter
	<a href="https://bitbucket.org/harviacode/codeigniter-crud-generator/get/213dd640bcf3.zip">https://bitbucket.org/harviacode/codeigniter-crud-generator/get/213dd640bcf3.zip</a>	

### A. Instalasi Codeigniter

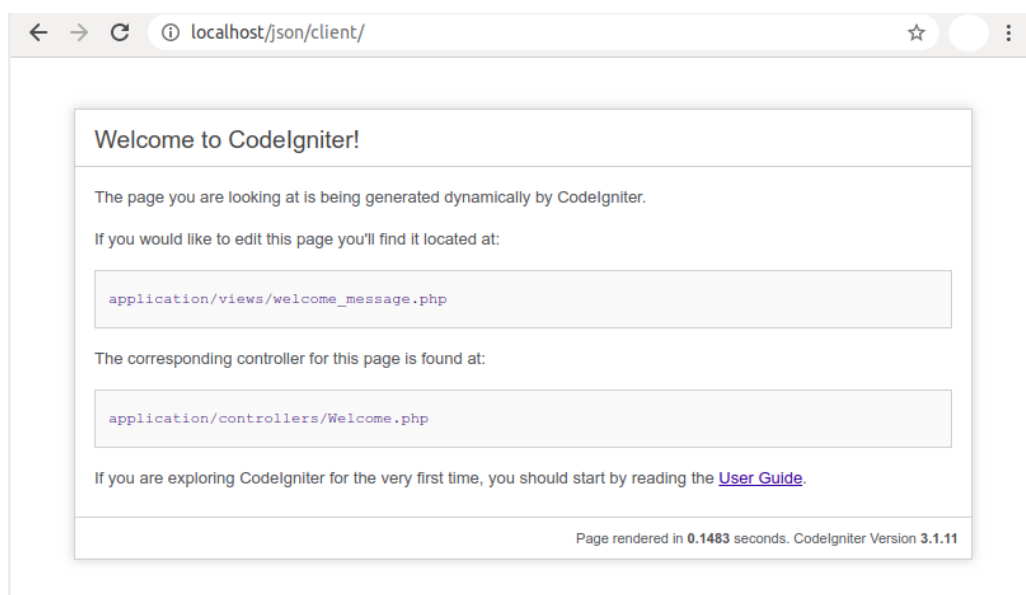

1. Siapkan folder “client” pada folder project “json” sebelumnya (c:/xampp/htdocs/json/client, atau /var/www/html/json/client).

2. Ekstrak paketan CodeIgniter, lalu copy isi folder paket CodeIgniter tersebut ke folder “client”.
3. Isi paketan Codeigniter adalah (folder Application, folder System, folder User\_Guide dan file index.php beserta file pendukung lain)

4. Nyalakan aplikasi XAMPP dan jalankan service "Apache" untuk mengaktifkan Web server (catatan: untuk instalasi pertama tidak memerlukan MySQL Server).
5. Setelah itu akses menggunakan Browser untuk melihat hasil instalasi Codeigniter dengan url: <http://localhost/json/client/>.

## B. Instalasi Harviacode dan Generate skrip CRUD

### **PENTING:** Persiapan pada Codeigniter sebelum menggunakan CRUD Generator

1. Pada file “application/config/autoload.php” lakukan load library “database” dan “session”, load helper “url”.

Load library:

```
44  /*
45  | -----
46  |   Auto-load Libraries
47  | -----
48  | These are the classes located in system/libraries/ or your
49  | application/libraries/ directory, with the addition of the
50  | 'database' library, which is somewhat of a special case.
51  |
52  | Prototype:
53  |
54  | $autoload['libraries'] = array('database', 'email', 'session');
55  |
56  | You can also supply an alternative library name to be assigned
57  | in the controller:
58  |
59  | $autoload['libraries'] = array('user_agent' => 'ua');
60  */
61  $autoload['libraries'] = array('database', 'session');
```

Load helper:

```
84  /*
85  | -----
86  |   Auto-load Helper Files
87  | -----
88  | Prototype:
89  |
90  | $autoload['helper'] = array('url', 'file');
91  */
92  $autoload['helper'] = array('url');
```

2. Pada file “application/config/config.php” , lakukan modifikasi sebagai berikut:

set \$config['base\_url'] :

```
25  */
26  $config['base_url'] = 'http://localhost/json/client/';
27
```

set config['index\_page'] :

```
37 */
38 $config['index_page'] = '';
39
```

set \$config['url\_suffix'] :

```
66 */
67 $config['url_suffix'] = '.html';
68
```

set \$config['encryption\_key'] :

```
326 */
327 $config['encryption_key'] = 'ftikusm';
328
```

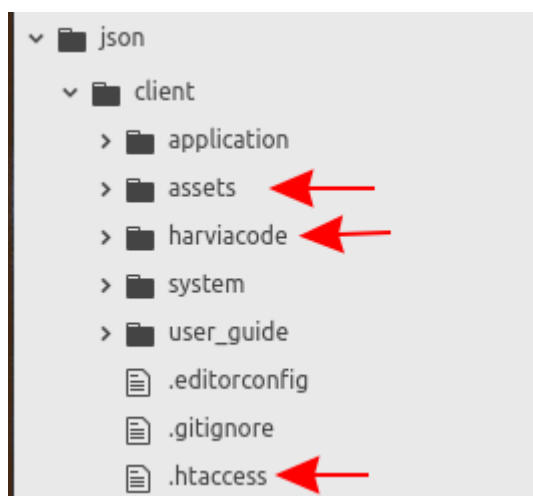

3. Pada file “application/config/database.php”, set hostname, username, password dan database

```
76 $db['default'] = array(
77     'dsn' => '',
78     'hostname' => 'localhost',
79     'username' => 'root',
80     'password' => 'root',
81     'database' => 'json',
82     'dbdriver' => 'mysqli',
83     'dbprefix' => '',
84     'pconnect' => FALSE,
```

Ganti  
dengan  
pass  
Mysql  
Anda

### Memulai CRUD Generator:

1. Ekstrak paketan Harviacode, lalu letakkan folder “harviacode” dan “asset”, serta file “.htaccess” ke folder “client”.

Catatan: untuk pengguna Mac dan Linux, pastikan izin akses folder ‘application’ dan ‘harviacode’ diubah menjadi 777

2. Buka alamat : <http://localhost/json/client/harviacode/> pada browser
3. Pilih tabel dan tekan tombol “Generate”

← → ↻ ⓘ localhost/json/client/harviacode/

Select Table - Refresh

### Codeigniter CRUD Generator

**About :**

Codeigniter CRUD Generator is a simple tool to auto CRUD generator will make a complete CRUD operat Generator using bootstrap 3 style. You still need to m

\* generate textarea and text input only

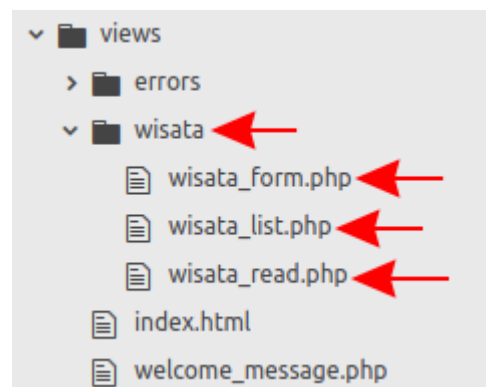

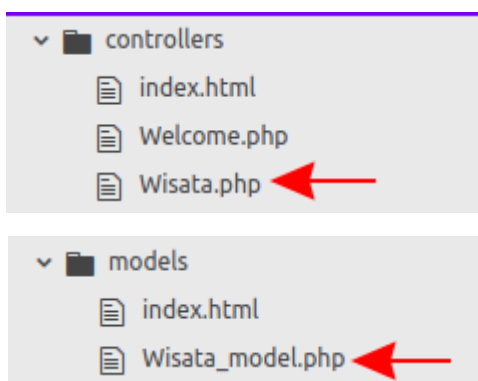

Please visit and like [harviacode.com](http://harviacode.com) for more info a

**Preparation before using this CRUD Generator (lr**

- On application/config/autoload.php, load datab
- On application/config/config.php, set :.
  - \$config['base\_url'] = 'http://localhost/you
  - \$config['index\_page'] = "
  - \$config['url\_suffix'] = '.html'
  - \$config['encryption\_key'] = 'randomstrin
- On application/config/database.php, set hostn:

**Using this CRUD Generator :**

4. Skrip kode yang dihasilkan adalah:

### C. Tampilan aplikasi Client “wisata”

#### Tampil data wisata:

Wisata List

Create  Search

No	Kota	Landmark	Tarif	Action
1	SEMARANG	LAWANG SEWU EWU	20000	<a href="#">Read</a>   <a href="#">Update</a>   <a href="#">Delete</a>
2	YOGYAKARTA	PRAMBANAN	35000	<a href="#">Read</a>   <a href="#">Update</a>   <a href="#">Delete</a>
3	MAGELANG	BOROBUDUR	2juta	<a href="#">Read</a>   <a href="#">Update</a>   <a href="#">Delete</a>
4	salatiga	rawapening	50000	<a href="#">Read</a>   <a href="#">Update</a>   <a href="#">Delete</a>
5	kendal	pantai cahaya	50000	<a href="#">Read</a>   <a href="#">Update</a>   <a href="#">Delete</a>

Total Record : 6 1 2 Next

#### Pencarian data wisata:
